## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 41-43, drawn to a valve mechanism, classified in class 137, subclass 72.
  - II. Claims 45-48, drawn to a hybridization chamber with a flexible membrane, classified in class 435, subclass 287.2.
  - III. Claim 49, drawn to a hybridization chamber with a porous membrane, classified in class 435, subclass 287.2.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I, Group II and Group III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

In the instant case the valve feature of the claims of Group I is not required of the inventions of the claims of Groups II and III. The flexible membrane feature of the claims of Group II is not required of the inventions of the claims of Groups I and III. The porous membrane feature of the claim of Group III is not required of the inventions of the claims of Groups I and II. None of the claims as presently written link together the inventions as set forth in Groups I to III. As a result, the inventions of the above claims are deemed to be independent inventions.

Art Unit: 1744

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
